Sekil 1 de görülen düzende band genis ligi 15 kHz 'lik bir temel band x(t) isaretinden x(1)= cos (2 xfc + 2 x Af) x(7) d7) FM

isareti elde edilmektedir.

Bu isaretten frekans carpma ve süzgecleme yöntemi ile :xc(t) FM isareti oluşturulmaktadır.

a) xult) işaretinin old 10 luk band geniş liği göre de serilmektedir. Buna göre taşıyıcı frekans fc ve frekans sapmasi Af'i bulunuz.
